

The State committee of Industry, Energy and Subsoil use of the Kyrgyz Republic announces
an auction for the license on the right to subsoil exploitation on the following objects:

照会先: 在日キルギス大使館
Tel.: + 81-3-6453-8277

№ Lot	Object	Type of mineral	Type of subsoil use	Location	Short Geological description	Start price of object
1	Suluterek deposit of Basalt on North-Eastern plot	Basalt	Development	Chui region, Kemin district	The balance reserves as of 01/01/2017 for category B + C1 are 1396 thousand m ³ .	37 700 (thirty seven thousand seven hundred) USD
2	Suluterek deposit of Basalt on South-Eastern plot	Basalt	Geological exploration	Chui region, Kemin district	For the first time the description of the basalts of the deposit was studied in 1931-1933 by A.A. Fedorovich and others. The deposits of the Lower, Middle and Upper Paleozoic, Paleogene, Neogene and Quaternary formations take part in the geological structure of the deposit. Also igneous rocks are widely represented.	

Auction will be held on 3 November 2017 year at 12-00 o'clock, at the building of the State Kemin Administration of Chui region. Registration of participants starts at 11-30 until 11-50 a.m.

Those willing to participate in auction must submit documents no later than 15:00 o'clock 30 October 2017 to the State committee of Industry, Energy and Subsoil use of the Kyrgyz Republic, address: Bishkek, Erkindik blvd, 2, room № 220.

The terms and conditions of an auction, the requirements for participation and other information related to the auction can be found on www.gkpen.kg, by phone (+996 312) 30-05-16, as well as in the Department of geology State committee of Industry, Energy and Subsoil use room № 209, everyday from 9-00 until 18-00 o'clock.

*The State committee of Industry, Energy and Subsoil use of the Kyrgyz Republic announces
an auction for the license on the right to subsoil exploitation on the following objects:*

№ Lot	Object	Type of mineral	Type of subsoil use	Location	Short Geological description	Start price of object
1	Kyzyltash deposit	gold	Geological exploration	Jalal-Abad region, Ala-Buka district	<p>The deposit was discovered in 1972. On the period of 1973 to 1974 detailed geological map was compiled of the scale 1: 5000.</p> <p>Gold in the field is associated with quartz veins. Forecast resources of gold in category C2 - 0.095 tons of gold with a content of 9.47g / t and category P1 - 3.265t with a content of 5.04g / t.</p>	62 200 (sixty two thousand two hundred) US dollars
2	Ishakuldin area	Gold	Geological exploration	Jalal-Abad region, Ala-Buka district	<p>Geological studies started in 1973. The surface area was studied in 1974-75: a schematic geological map of scale 1: 50000 was compiled.</p> <p>A cluster of small quartz veins forming an isometric Stockwork with a size of 150mx200m has been found on the area, however, there are no increased gold contents in it. The bulk of gold is concentrated in large steeply dipping quartz veins - ore bodies.</p> <p>The gold content ranges from 0.2 to 3.0 g / t.</p>	38420 (thirty eight thousand four hundred twenty) US dollars

Auction will be held on 8 December 2017 year at 12-00 o'clock, at the building of the State Ala-Buka Administration of Jalal-Abad region. Registration of participants starts at 11-30 until 11-50 a.m.

Those willing to participate in auction must submit documents no later than 15:00 o'clock 4 October 2017 to the State committee of Industry, Energy and Subsoil use of the Kyrgyz Republic, address: Bishkek, Erkindik blvd, 2, room № 220.

The terms and conditions of an auction, the requirements for participation and other information related to the auction can be found on www.gkpen.kg, by phone (+996 312) 30-05-16, as well as in the Department of geology State committee of Industry, Energy and Subsoil use room № 209, everyday from 9-00 until 18-00 o'clock.

an auction for the license on the right to subsoil exploitation on the following objects:*

№ Lot	Object	Type of mineral	Type of subsoil use	Location	Short Geological description	Start price of object
1	Sarydjaz area	uranium-molybdenum-vanadium	Geological exploration	Issik-Kyl region, Ak-suu district	<p>A detailed study of the area of the Sarydjaz area was started in 1931 in connection with the discovery of erythrine by V.M. Biryukov in the calcite veins of the Berkutsk polymetallic deposit.</p> <p>In the geological structure of the area, the deposits of the Jacobolot (V), the Berkut (E-O1), the Oljoba and Tez (O2) suites occur in the sequence indicated on the ancient (Proterozoic) granites of the Sarydjaz complex.</p> <p>The Sarydzh deposit is currently the largest explored site for uranium and molybdenum in Kyrgyzstan.</p>	14790 (fourteen thousand seven hundred ninety) US dollars

Auction will be held on 8 December 2017 year at 12-00 o'clock, at the building of the State Ak-Suu Administration of Issik-Kyl region. Registration of participants starts at 11-30 until 11-50 a.m.

Those willing to participate in auction must submit documents no later than 15:00 o'clock 4 October 2017 to the State committee of Industry, Energy and Subsoil use of the Kyrgyz Republic, address: Bishkek, Erkindik blvd, 2, room № 220.

The terms and conditions of an auction, the requirements for participation and other information related to the auction can be found on www.gkpen.kg, by phone (+996 312) 30-05-16, as well as in the Department of geology State committee of Industry, Energy and Subsoil use room № 209, everyday from 9-00 until 18-00 o'clock.
